

The passenger seat; it's not just for your briefcase anymore

With steady population and traffic growth along the Wasatch Front, it's no surprise that local commuters are experiencing traffic headaches. But now that I-15's carpool lanes extend from 600 North in Salt Lake County to the Alpine interchange in Utah County, 25 miles of maximum-strength relief is available. Just take a passenger with you, head to the inside lane and start getting used to life in the fast lane.

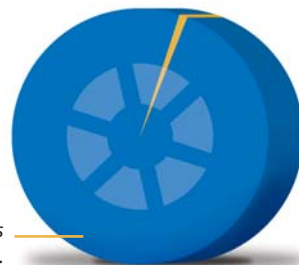

Carpooling can help commuters:

- Save 15 to 20 minutes during heavy commutes
- Save money on gas
- Save miles on their cars
- Reduce congestion on the road

Recent research shows that carpool use has grown by 35 percent since 2002 and that 98 percent of Utahns think carpool lanes are a fair or even excellent idea.

Best of State Winner BEST OF STATE UTAH 2004

Welcome to the Utah Department of Transportation

UDOT employees are committed to meeting the challenges of the state's growing transportation needs. This Web site provides information about our work, including construction and maintenance projects, public meetings and business opportunities.

Mountain View Corridor Design Elements Presented

SALT LAKE CITY - The Mountain View Corridor (MVC) Environmental Impact Statement (EIS) team announced details for its eight transportation concepts at a stakeholder committee meeting today in West Valley City. The details, which include roadway interchange locations, number of roadway lanes, depressed roadway sections, transit station locations and transit alignment, is also available to the general public via the project website at www.udot.utah.gov/mountainview.
